Environment Day Program

Street corners, public places, hospitals, and schools were few of the places where the enthusiastic team planted fruit trees in Assam & Karnataka. They taught the villagers about benefits of growing trees. Few saplings were gifted to travelers who joyfully said they would grow it in their garden.

Embracing Widows

To feel accepted is a great emotional security! Widows in the community are ostracized and left to feel lonely. To show them we care, 30 widows from Panikhowa village were identified and given mosquito nets. 48 Widows hailing from Binodpur & Petkulchand received bedspreads. With tearful eyes they expressed their thankfulness!

Learning made Fun

This summer we had the privilege to bring kids together in large numbers in many villages. Learning and interaction were done through games, coloring activities and listening to stories. Around 700 children from Haryana, Punjab & Uttar Pradesh were engaged in the activity this month.
