SUMMER OUTREACH

Engaging the children in meaningful activities during the summer school break bridges the learning gap and refuels them for the academic year ahead. The activities focus on the physical, mental wellbeing while balanced with lots of fun.

SEMINAR & TRAINING

We had a wonderful opportunity to visit and train the students and staff of a mission Hospital in a remote location in Tamil Nadu. Interactive lectures and team activities helped the hospital crew to learn more about Soft Skills in Health Care.

MOTHER'S DAY

Children were a part of this program. It was a pleasant surprise for the mothers as children spoke words of love and appreciation. Umbrellas were distributed to the 30 women who participated in the celebration.

ENGLISH COACHING

Few young people made up their mind to sharpen their skills in communication and English speaking when the others are enjoying a summer break. The newly constructed mini hall facilitates this learning experience with all the needed ambience and basic amenities.

"Empowering rural communities isn't just about serving them; it's about walking alongside them, listening to their needs, and amplifying their voices as we work together to build a brighter, more equitable future for all."
